1. The following is an examiner's statement of reasons for allowance: the method of operating a plasma fuel reformer comprising the steps of: generating a plasma arc, advancing a first air/fuel mixture having a first air-to-fuel ratio into the plasma arc, determining if a soot purge of the plasma fuel reformer is to be performed and generating a purge-soot signal in response thereto, advancing a second air/fuel mixture having a second air-to-fuel ratio into the plasma arc in response to generation of the purge-soot signal wherein the second air-to-fuel ratio is greater than the first air-to-fuel ratio. The step of determining if a soot purge of the plasma reformer is to be performed is missing in the prior of record.
